

It's about transforming lives

Canadian Tiger Swallowtail
Papilio canadensis

The Canadian Tiger Swallowtail is an eye-catching tiger-striped butterfly. Traditionally a species of open woodlands, it is sometimes found north of the tree line and in urban areas. In Canada it is found in all provinces and territories as far north as the Arctic circle.

The Swallowtail Butterfly Bequest Society: a group of individuals who make a consideration for the work of CHS in their Will. Your promise today is a gift to tomorrow's deaf, deafened and hard of hearing individuals and their families. The Canadian Hearing Society serves those who are deaf, deafened and hard of hearing.

Most butterflies are deaf.
